The President's Message

Hello everyone!

February is one of those months that seem to just be unimportant, like a filler between January and March on the calendar. Perhaps its most noteworthy distinction is Groundhog Day. For most, that usually means 6 more weeks of winter. For the younger crowd, maybe what comes to mind is the premise in the movie and "it's Groundhog Day all over again!". (Perhaps that might be the take on my columns for some of you). Well, I thought I'd try something different.

Of course, in Chicago, it seems like we always have 6 more weeks of winter, and we certainly saw that with the big snow storm we had. Over the years I have told many friends and acquaintances that in Chicago, winter isn't over until the Cubs or Sox get "snowed out" at least once (since we all know it can still snow in early April)!

Speaking of the Cubs and Sox, can winter really hang on much longer? As I write this, both teams are playing their first Spring Training games! Yay, spring! The improving weather that comes should bring more of you out to our meetings. I, for one, can hardly wait; warmer weather, more friends gathering together, and two TV's in the bar tuned to baseball: one with the Cubs game and the other with the Sox game. Ahhhh, springtime in Chicago, when in March and April we all have dreams of our two teams facing off in the World Series! Around July we'll probably snap out of our dream and come back to reality. In the meantime, enjoy the build-up and anticipation of spring.
